EDUCATION

NUST - National University of Sciences and Technology

B.S. in Computer Science (4th Semester)

CGPA: 3.75

Islamabad, Pakistan

Expected June 2028

Relevant Coursework: Data Structures & Algorithms, Artificial Intelligence, Object Oriented Programming, Computer Networks, Database Systems, Programming Fundamentals.

EXPERIENCE

10 Pearls

Islamabad, Pakistan

Full-Stack Developer Intern

April 2026 – Present

- Developing a full-stack **Notes Management Application** using **Node.js, React, and MongoDB** with user authentication and CRUD-based REST APIs.
- Implementing **logging (Pino)**, **unit testing (Mocha/Jest)**, and global exception handling to improve reliability and maintainable backend architecture.

PROJECTS

PSX Expert Advisor – *JavaScript, Flask, Pandas, NumPy*

- Built an **AI-driven tool** to automate **Pakistan Stock Exchange** data extraction and identify trading opportunities.
- Computed **technical indicators (RSI, SMA, EMA)** and used **rule-based logic** to generate explainable **Buy/Sell/Hold** signals.

RAG-Based NUST Admission Assistant - *Python, FAISS, Qwen2.5:1.5b LLM, Streamlit*

- Designed an **AI-driven chatbot** to assist prospective students with NUST admission queries via **official FAQ data**.
- Implemented **RAG pipeline** with **vector search** and **LLM integration** for accurate, context-aware responses.

Emotion-Aware Chatbot – *React, Node.js, Gemini API, ElevenLabs API*

- Built an **emotion-aware AI chatbot** that detects facial expressions in real-time and generates empathetic responses using **Google Gemini API**.
- Developed a real-time emotion classification using **face-api.js** and integrated **ElevenLabs Text-to-Speech** to generate emotion-adaptive voice responses.

PowerPark - EV Charging Station Management System - *Java, JavaFX, MySQL*

- Architected a **full-stack JavaFX/MySQL** solution for slot booking, resource allocation, and live availability tracking with custom user permission levels.
- Implemented secure session handling, input validation, and modular **OOP-based** design patterns.

GameHub - Video Game Discovery App - *React, Rawg.io API, TypeScript*

- Built a **React app** to browse and discover video games with dynamic search, filtering, and **real-time API data fetching** in a responsive UI.

SKILLS

- Technical Skills:** Python, TypeScript, Java, SQL, JavaScript, HTML, CSS, C/C++.
- Libraries/Frameworks:** React, Node.js, MongoDB, Express, Bootstrap, MySQL, SQLite, Flask.
- AI/ML:** Gemini API, Prompt Engineering, ElevenLabs API, RAG Basics, NumPy.
- Tools:** Git, Postman, Claude.
- Soft skills:** Teamwork, Problem Solving, Effective communication, Time management.

CERTIFICATES

- AI For Everyone - **DeepLearning.AI**
- Introduction to Git and Github - **Google**
